SD Council of Substance Abuse Directors

A Network of Help when you need it the most!

**South Dakota Council of
Substance Abuse Directors, Inc.
PO Box 532
2520 East Franklin Street
Pierre, South Dakota 57501
Phone/Fax: 605-224-0123
Email: tladosch@dakota2k.net**

Executive Director: Terrance L. Dosch

About the Council:

The Council's membership consists of fourteen community-based chemical dependency/addiction treatment services providers. Acting together, in partnership with the State of South Dakota, CSAD represents a virtual statewide system of coordinated care. This group represents the "front-line" or initial point of contact for most persons in the state who seek comprehensive alcohol/drug prevention, treatment, or rehabilitation services.

Each agency contracts with the South Dakota Department of Human Services, Division of Alcohol and Drug Abuse to provide services that begin the road to recovery for many South Dakotans.

Additionally, skilled professionals are available to assist schools, communities, community groups, clubs, organizations, to develop local drug and alcohol prevention efforts.

We Believe

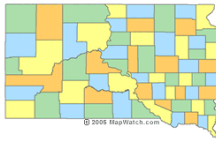

No one wants to experience a problem with alcohol or other drugs. No one wants a family member, a friend, a loved one, a husband, or a wife to suffer through this daunting life experience.

Yet, despite the best of intentions, about 10% of South Dakotans will need help with just such a problem at some point in their lifetime.

The help people need can vary. One thing that is for certain: If you become dependent on a mood altering chemical, primary treatment and aftercare are likely the best allies. Family or individual counseling and treatment can be of critical assistance in repairing your life.

Years of experience and a significant body of research have taught us several key facts:

- ❖ Treatment can and does help people who are willing to work hard at change;
- ❖ Families are deeply affected by the problems associated with substance abuse problems;
- ❖ Family members can improve the quality of their lives, even if their loved one doesn't recover;
- ❖ Chemical dependency is no respecter of age, sex, religion, race, or any other factors for that matter. It can and DOES happen to ALL of society; and
- ❖ Addictions are far less about moral character than they are about loss of control.

Help is available in your community:

CSAD CRITERIA

CSAD MEMBERS ARE DISTINGUISHED BY TWO KEY FEATURES: 1) THEY ARE COMPREHENSIVE SERVICE PROVIDERS; AND, 2) THEY FUNCTION WITHIN THE FRAMEWORK OF AN EFFECTIVE COMMUNITY-BASED SYSTEM OF CARE. CSAD MEMBERS MUST MEET THE FOLLOWING SPECIFIC CRITERIA –

A. COMPREHENSIVE SERVICES PROVISION REQUIREMENTS:

- 1. PROVIDE AND ASSURE ACCESS TO COMMUNITY PREVENTION, SCREENING, ASSESSMENT, EARLY INTERVENTION, OUTPATIENT/INTENSIVE OUTPATIENT, CONTINUING CARE, CASE MANAGEMENT, AND REFERRAL SERVICES TO SOUTH DAKOTA RESIDENTS;**
- 2. PROVIDE INTEGRATED SERVICES TO PERSONS WITH CO-OCCURRING MENTAL ILLNESSES AND SUBSTANCE ABUSE PROBLEMS AND MAINTAIN EFFECTIVE LINKAGES WITH OTHER HEALTH CARE SERVICES AND SOCIAL SUPPORTS;**
- 3. GUARANTEE 24/7 ON-CALL CRISIS SERVICES WITH ACCESS TO COUNSELORS WHO ARE EMPLOYED BY THE AGENCY;**
- 4. ENSURE THAT COMPLETE, LIFE-SPAN SERVICES ARE PROVIDED TO ALL REGARDLESS OF ABILITY TO PAY, THERE BY ASSURING A PUBLIC SAFETY NET FOR THE INDIGENT; AND,**
- 5. BE ORGANIZED IN A COMMUNITY-BASED, MISSION DRIVEN MANNER WHICH IS CHARACTERIZED BY THE FOLLOWING:**
 - LOCALLY GOVERNED BY A BOARD OF DIRECTORS**
 - RESPONSIVE TO COMMUNITY PRIORITIES AND NEEDS**
 - CAPABLE OF FACILITATING COMMUNITY ASSESSMENT AND ACTION PLANNING**

B. SYSTEM OF CARE REQUIREMENTS:

- 1. NETWORK & COORDINATE PROGRAMS WITH OTHER CSAD MEMBERS TO UNDUPLICATE SERVICES AND TO MUTUALLY ASSURE THE AVAILABILITY OF COMPREHENSIVE SERVICES (AS DEFINED IN SECTION A.1., ABOVE);**
- 2. COLLABORATE WITH OTHER CSAD MEMBERS TO EFFECTIVELY MANAGE IN-STATE AND OUT-OF-STATE REFERRALS TO MUTUALLY ASSURE THE ACCESSIBILITY OF COMPREHENSIVE SERVICES (AS DEFINED IN SECTION A.1., ABOVE); AND,**
- 3. MAINTAIN ACTIVE PARTERSHIPS WITH – AND SERVE AS A SINGLE POINT-OF-CONTACT FOR – STATE AGENCIES, LOCAL GOVERNMENTS, AND COMMUNITIES TO SET STANDARDS, IMPROVE CARE, ADDRESS PRIORITIES AND SOLVE PROBLEMS.**

PROGRAM/SERVICE DEFINITIONS

The following program/service definitions are derived from the Division's 2013 Fiscal Contract Amendment language and the current Administrative rules. Accreditation references in this Directory are based on determinations made by the Department of Human Services, Division of Alcohol and Drug Abuse as a result of annual on-site accreditation reviews.

Prevention Program: A planned and recurring sequence of multiple, structured activities established to inform, educate, impart skills, deliver services, and/or provide appropriate referrals for other services, through the practice and application of recognized prevention strategies.

Early Intervention Program: A non-residential program that provides early intervention services to individuals, including those with emotional disturbances or mental health or medical conditions, who may have substance use related problems, but do not appear to meet the diagnostic criteria for Substance-Related Disorder. The program shall provide treatment needs assessment, intervention, alcohol and drug education, education about co-occurring conditions impacted by substance abuse, and referral;

Outpatient Services Program: A non-residential program which provides chemically dependent/abuse clients, including those with co-occurring mental health conditions, a clearly defined, structured treatment program on a scheduled basis. The provider may provide to each client any combination of individual, group, or family counseling services as required by the continued service criteria pursuant to ARSD 46:05:15:08 with no more than a maximum of 8 hours of counseling per week;

Intensive Outpatient Treatment Program: A non-residential program which provides chemically dependent/abuse clients, including those with co-occurring mental health conditions, a clearly defined, structured, intensive treatment program on a scheduled basis. This program should include integrated programming and services for individuals with co-occurring mental health conditions. Intensity of services required is a minimum of 9 hours and maximum of 19 hours of counseling per week; to be provided within 3 separate sessions, 3 separate days of the week;

Intensive Outpatient Treatment (SLIP/SLOT): A non-residential program which provides chemically dependent/abuse clients, including those with co-occurring mental health conditions, a clearly defined, structured, intensive treatment program on a scheduled basis. The program should include integrated programming and services for individuals with co-occurring mental health conditions. There is special emphasis on relapse prevention planning. Clients who attend this program are also receiving services in the clinically managed low-intensity residential treatment program. Clients for this category must receive prior approval by the Division of Alcohol and Drug Abuse. Intensity of services required for reimbursement is a minimum of 9 hours and maximum of 19 hours of counseling per week.

Intensive Day Treatment Program: Day treatment is a program providing a minimum of 20 hours for adults, 15 hours for adolescents of structured intensive treatment services per week. The program should include integrated programming and services for individuals with co-occurring mental health conditions. Intensity of services required for reimbursement is 20 hours for adults/15 hours for adolescents per week.

Clinically-Managed Residential Detoxification Program: A clinically managed residential detoxification program providing for the supervised withdrawal from alcohol or drugs of persons without known serious physical complications and without acute psychiatric decomposition requiring a higher level of care. Such facilities welcome individuals with co-occurring mental health and medical conditions, where such conditions are not sufficiently acute or unstable to warrant a higher level of care than can be provided in a non-medical facility. The program shall furnish temporary care, including provisions for taking prescribed medical or mental health medication, information, counseling, evaluation and referral, and provide for entry into the continuum of treatment services;

Level III.1 Clinically-Managed Low-Intensity Residential Treatment Program: A residential, peer oriented treatment program of sub acute care designed to aid the client's re-entry into society. The program must provide direct alcohol and drug counseling, and support service counseling by referral. The program shall provide case management services that will help clients to find employment and to coordinate other services as may be necessary to facilitate the client's successful re-entry into the community. The program should also include integrated programming and services for individuals with co-occurring mental health conditions. Intensity of services required is a minimum of 5 hours and maximum of 8 hours of counseling per week.

Level III.7 Medically-Monitored Intensive Inpatient Treatment Program for Adults: A residential treatment program of sub-acute care, which provides medically monitored structured and intensive treatment for chemically dependent clients. The program should also include integrated programming and services for individuals with co-occurring mental health conditions. Intensity of services required is 30 hours for adults/15 hours for adolescents per week. For the adult program, clients may attend specialized topics that address specific needs outlined in the treatment plan for 9 of the 30 required hours.

Gambling Program: Services provided to individuals determined to have a gambling problem and services to individuals who are affected by someone else's gambling, including those with co-occurring mental health conditions. Various levels of services designed to meet the needs of individuals with gambling problems and their family members. Services can include assessment, individual and group therapy, structured outpatient treatment, day treatment and Level III.7 medically monitored intensive inpatient treatment program for adults.

Recovery Support Services: Networks of formal and informal services developed and mobilized to sustain long term recovery for individuals and families. Recovery Support services may include home visiting, linkages to community-based programs, supporting the client's participation in medical or psychiatric care, child care and advocacy, self-help programs, peer and faith-based support groups, transportation, monitoring and outreach, parent education and child development, employment services and job training.

19 Tribes and 5 Urban Indian Program in North Dakota, South Dakota, Nebraska, Iowa

Eligibility:

Adolescents (13-17 years of age), enrolled members of a Federally recognized Tribe with a primary diagnosis of drug or other drug addiction/abuse.

Fees:

As a federally funded and operated facility, the YRTC utilizes the Center for Medical Services to determine the reimbursable DRG rate/fee. Indigent funding is available.

Services:

Residential alcohol and other drugs addiction or abuse treatment and therapy provided through individual or group therapy. On-site education services provided by a South Dakota Department of Education certified alternative education program.

Description:

The program provides the adolescents with a treatment and therapy plan that incorporates Lakota Indian culture and spiritualism into the delivery of individual and group therapy and experiential outings. In addition, the twelve steps of Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) are introduced and practiced through; Step study sessions, Big Book sessions, Ala-teen, Al-Anon and AA meetings.

The “Truthought Corrective Thinking Process” is utilized and paralleled to the Lakota Indian Value system as a means to assist the adolescent with their decision making processes and practice more acceptable behavior for all environments of their lives.

Health promotion and disease prevention education; diabetes, obesity/dietary, smoking cessation, etc., are provided as part of the treatment curriculum. Basic life skills are included as part of treatment and alternative education curriculum.

Family Days: Adult family members (18 or older) are invited to participate in family sessions which occur during the treatment episode for each adolescent with activities to assist the family with communication and to assist the adolescent with relapse prevention.

Bed Count: 18 (8 Female and 10 male)

Facility: Non-Profit

Accreditation 4/6:

Early Intervention, Intensive Outpatient Services, Outpatient Services

Area Served:

Sioux Falls and surrounding communities, SW Minnesota, NW Iowa

Eligibility:

Individuals, couples, and families appropriate for outpatient services related to mental/behavioral health and/or chemical dependency concerns.

Fees:

Methods of payment: Insurance, Medicaid, State funding, sliding fee scale.

Services/Description:

Assessment/Evaluation (adult & adolescent):

Evaluation services that begin by gathering detailed information regarding an individual's chemical use and general mental health functioning. The evaluation progresses to identify any effects chemical use has had on specific life areas. Evaluations determine if and what criteria for chemical abuse or dependency and any mental health disorders have been met. Finally, evaluations provide a comprehensive recommendation for the most appropriate level of care.

Intensive Outpatient Chemical Dependency Treatment Services (adult & adolescent):

Designed to focus on core issues related to addiction, life areas affected, family functioning, spirituality and over-all mental health. This program provides a highly interactive environment allowing individuals to experience informative, energetic, and genuine interactions with others utilizing targeted discussions and activities. The Intensive Outpatient Services Program is provided in an open-ended group setting. Program members may participate in individual, couples and family sessions as needed.

Outpatient Chemical Dependency Treatment Services (adult & adolescent):

Designed to focus on core issues related to chemical dependency, relapse prevention, spirituality, mental health and overall long term change. This program provides a highly interactive environment allowing individuals to experience informative, energetic and genuine interactions with others utilizing targeted discussions and activities. Individual and group services are available.

Individual, Couples and Family Therapy:

Designed to focus on issues related to family functioning, anxiety and mood disorders, chemical dependency, stress management and spiritual development.

Level III.1 Clinically Managed Low Intensity Residential, Early Intervention, Gambling, Medically Monitored Intensive Inpatient for Adults, Outpatient Services

Area Served:

State of South Dakota

Eligibility:

Females, ages 18 and above who are pregnant and in need of chemical dependency treatment and females with dependent children (to age 8) in need of chemical dependency treatment.

Fees:

Title 19 Reimbursement, insurance, State funds and Access to Recovery

Services:

Treatment Needs Assessments, Level III.7 Inpatient Residential Programming, Level III.I Low Intensity Residential, Recovery Support Services, Gambling Assessments, Level I Outpatient Individual and Group Services.

Description:

Assessment and residential treatment for pregnant and/or parenting adult females and their children.

Full Circle is a residential program located in Rapid City, SD for 18 and older pregnant and parenting females, and their dependent children, who are struggling with drinking and/or taking drugs and who lack the ability to abstain from drinking or taking drugs. This program provides coordinated substance abuse intervention and treatment, health care, and supportive services to pregnant and/or parenting women.

The goals of Full Circle are for participants to develop a recovery based lifestyle, make a successful transition into independent living arrangements, be quality parents to their children, and avoid long term dependency on the social services system. The program consists of 3 phases. Phase One is medically monitored inpatient chemical dependency treatment and lasts typically 6 weeks. In this phase, the clients learn how drug and alcohol use affects them and their children, new ways of coping with life, or relating to others and self, and they acquire the tools they need to aid them in living a recovery oriented lifestyle. Phase 2 is the Clinically Managed Low Intensity Residential Phase of the program and is designed to provide women with a safe, secure, and structured place to stay before and after the baby is born. Case Managers help obtain housing and become involved in education, vocational programs, and parenting classes among other services. Residents are encouraged to utilize the group home styled facilities for 3 months post birth. In Phase 3, Full Circle offers case management and aftercare services upon a client's discharge from Phase 2. Services included in this phase would be continued provision of support groups and counseling, as well as ongoing linking with vocational, childcare, educational, and support services in the community. Women can be referred to this facility by Law Enforcement, Social Services, Human Services, Tribal Entities, the private sector such as physicians and attorneys, and others including family members.

Early Intervention, Intensive Outpatient Treatment, Level III.1 Clinically Managed Low Intensity Residential Treatment, Outpatient Services, Prevention

Area Served:

Greater Sioux Falls area, Southeastern South Dakota, Southwestern Minnesota, and Northwestern Iowa.

Eligibility:

Need for education, counseling, crisis intervention or treatment

Fees:

Sliding scale fee

Description:

The goal of Carroll Institute is to eliminate the problems associated with drug and alcohol abuse. We address the problem of the individual first, helping them to identify the tragic results of untreated addictions. Our counselors then stress the importance of learning how to make the right choices in overcoming addictive thinking. Treatment helps one to recognize, accept and deal with the problems that have resulted from abuse of drugs and alcohol.

Addictions always have a way of affecting so many more people, often impacting unintended victims in the family. The Carroll Institute works with families as a system offering each member the chance to participate in group and individual sessions to aid in the recovery process.

We provide all our clients with comprehensive and cost effective services. In so doing, the Carroll Institute is committed to providing individual and our community, as a whole, leadership and expertise in the prevention and treatment of alcohol and drug abuse and addiction. Below is an outline of the services we provide.

Services:

Prevention Programming:

Project Awareness: Prevention and Education. This program reaches over 14,000 young people and families every year in the greater Sioux Falls area. The program was developed 30 years ago by the Sioux Falls School District, Courts and the local PTA after a young girl died from the effects of drug abuse. What started as a drop-in center for kids has now developed to a program with counselors in area schools within a 60 mile radius of Sioux Falls who provide education, support training, crisis intervention with families and support groups for students having difficult adjustments. Work with families is accomplished through two innovative programs: “Level I” (first time offender’s program) and “Intensive Prevention Program” (IPP). We also offer an 19-20 year old Young Adult Diversion Program. By design, family involvement is mandated by referrals from courts and strongly recommended by Carroll Institute.

Early Intervention: The procedures by which a counselor identifies and evaluates an individual’s strengths, weaknesses, problems and needs for the development of a treatment plan.

Outpatient and Intensive Outpatient Services:

Carroll Outpatient, Intensive Outpatient & Jail Treatment: Treatment services for Adults: Approximately 1500 people in southeastern South Dakota receive evaluations, urinalysis, individual counseling, family therapy and group therapy, multiple-family group, Parent Support Group and Aftercare each year.

Our Adult Intensive Outpatient Treatment Program is a comprehensive program for adults. It includes corrective thinking, feelings investigation, self-esteem, anger/grief issues, goal setting, relationship issues, support systems, relapse prevention, individual and family counseling and a strong 12 Step foundation.

Our Jail Treatment Program is also an intensive outpatient treatment program for incarcerated adults. This program provides Minnehaha County Jail Inmates with alcohol and drug issues the opportunity to seek treatment and begin working towards skills necessary to live a clean and sober lifestyle when they are released.

Our Aftercare Program is a one hour per week reconnection for clients beginning recovery from drugs and alcohol. The group discussion topics are a more in-depth look at issues that can make or break recovery. Topics include relapse prevention, trust building, values, feelings, anger management, relationships, etc...

Methamphetamine Treatment Program:

Our Methamphetamine Treatment Program began on September 18, 2006. This program is a 12 to 18 month intensive outpatient treatment program utilizing the Matrix Model. Clients must have a minimum of two weeks detoxification time prior to entering the program. They will attend 16 weeks of intensive outpatient services, (some will be residing in a half-way house while completing this phase), followed by continued residential treatment if needed and 6 to 9 months of aftercare services. Individual and family sessions are included. Family education is also provided in a group setting. Contingency management is utilized for attendance and negative urinalysis testing. Urinalysis testing is completed frequently.

Prevention:

South Dakota Public Safety DUI Program: A prevention and education program using standardized DUI curriculum focusing on changing risky behavior of drinking and driving. The approach is non punitive requiring participants to develop a change plan – “...based on the belief that people have the power to change behavior if they have the motivation and tools to do so.” The target population for this curriculum is defined as first-time DUI Offenders age 18 years old and above. The program is 12 hours in length meeting on two Saturdays each month.

Diversion Program: A prevention and education program 8 hours in length offered both day and evening. The program is geared for 18-20 year olds using a Prime for Life curriculum utilizing videos, lectures and discussions.

Intensive Prevention Program: A prevention and education program 16 hours in length offered on Monday and Tuesday evenings. The program is geared for 19-20 year olds using a Prime for Life curriculum utilizing videos, lectures and discussions.

Moral Reconciliation Therapy (MRT): Is an objective, systematic treatment system designed to enhance ego, social, moral and positive behavioral growth in a progressive, step by step design. MRT has 12 steps that attempt to change how individuals make decisions and judgments by raising moral reasoning.

Clinically Managed Low Intensity Residential Programs:

Arch Halfway House: A rehabilitative residence for men recovering from chemical dependency: The “Arch Halfway House” has served over 3000 people since it opened in 1973. Concerned families initiated the program and gained community support to purchase the former Lutheran Church parsonage, which was converted to provide a halfway house program for those returning to the community from inpatient treatment or prison. The Arch Halfway House phone number is 605-332-6730 and has a capacity of 35.

Changes and Choices: Changes and Choices is a low-intensity residential treatment program for women. It was established in January 2005 with the purpose of affording chemically dependent women a safe, secure, drug-free facility to heal from harmful addictions in a positive and caring environment. We are able to house up to 24 women at a time and provide all of the essentials needed for a healthy and successful stay. Some program elements of the program include but are not limited to secure, drug-free residence, daily nutrition, 24 hour staff, individual, group and family therapy, employment assistance, recreational therapy, working to develop a support system, life skills, relapse prevention, spirituality, anger management and corrective thinking. Changes and Choices phone number is 605-332-9257.

Description:

Transitional Care, Custodial Care Services and Outpatient Services:

Specialized Meth/Opiate Treatment: This is a specialized program offering a variety of continuums at City/County Alcohol & Drug Programs' Adams Street Facility (satellite office) in Rapid City, SD for adult males and females. The program offers pre-treatment support services, detoxification, day treatment, intensive outpatient treatment, outpatient services and residential components to individuals with a methamphetamine and/or opiate dependence diagnosis. The level of programming is based on client's individualized needs. It also offers a follow up continued care program to assist with ongoing treatment needs.

A basic description of each phase is outlined below:

Pre-treatment Phase: Individuals can engage in outreach recovery support services through case management, individual and group counseling. Primary goals are to reduce fear, establish a therapeutic rapport, offer emotional support, receive education on addiction and community resources, and complete an initial assessment and treatment plan addressing immediate needs.

Contingency management incentives are offered based on active participation in programming, completing treatment plan objectives in a timely manner, producing negative drug screen, and engaging in a higher level of treatment if deemed necessary.

NOTE: Random breathalyzer testing and drug screenings are conducted in all phases of treatment.

Phase One-Stabilization: Initial and ongoing assessment in a Social-Setting Detox at CCADP on Lacrosse Street in Rapid City, SD. The length of this phase is based on an individual's need under the direction of medical personnel. Physician, nursing staff, emergency medical technicians and chemical dependency counselors will comprise the clinical care team during Phase I. If a client is admitted and no longer experiences withdrawal symptoms, the client will be moved into Phase II to begin Day Treatment.

Phase Two- Intensive Day Treatment: If deemed appropriate by counseling staff, clients may enter the program at this stage and/or may be determined appropriate for non-residential programming. This methamphetamine and/or opiate specific Day Treatment program consists of 20-hours of therapy per week. This phase includes individuals, group and family therapy. The Matrix Treatment Model is an evidence-based curriculum proven effective for treating methamphetamine and/or opiate addiction. This model, along with the Truthought Corrective Thinking curriculum, is used to assist clients in developing coping skills and responsible decision-making. Motivational Interviewing, Stages of Change, and Client Driven Treatment Plans are strategies used to assist individuals in the treatment planning process. Twelve-Step sponsorship is highly encouraged in this phase of treatment. Case Management, EMT/Tech staff, and chemical dependency counselors will comprise the clinical care team during Phase II. Mental Health services are available, if needed, at Behavior Management System (BMS) or Sioux San Mental Health in Rapid City, SD.

NOTE: Length of stay is based on individual's needs and treatment progress.

Phase Three-Structured Living: After successful completion of Phase II, individuals may be referred to an Intensive Outpatient Treatment program based on individual's needs. This level of care offers a minimum of 9 hours and up to 15 hours of therapy per week to include individual, group and family therapy. Residential placement is available if needed. Case Management, EMT/Tech staff and chemical dependency counselors will comprise the clinical care team during Phase III. Individuals continue to work on primary chemical dependency issues, engage in recovery support groups and establish social support networks conducive to recovery needs.

NOTE: Length of stay is based on individual's needs and treatment progress.

Phase Four-Community Placement: Residential services are available upon request. Average length of stay is approximately 90 days. This level of care offers a minimum of 5 hours of therapy per week. Transitional services support individuals in establishing independent living.

NOTE: Length of stay is based on individual's needs and treatment progress.

Continued Care Programming: Individuals are encouraged to participate in Continued Care Programming to enhance recovery efforts. It takes time to build a solid support system and establish working relationships conducive to recovery. Our goal is to assist individuals in achieving their goals so they can enhance their quality of life.

NOTE; Length of stay is based on individual's needs and treatment progress.

Half-way House Residential Treatment:

Level III.I Low-Intensity Residential Treatment: The primary goal for this level of residential care is to provide chemically dependent adult males a safe, sober, supportive atmosphere during transition into the community. This level of care requires 5 hours of group per week and average length of stay is 90 days. Program includes meals, shelter, individual/group counseling, family education, employment assistance, referrals for non-provided services, recreational activities, and transportation means. All clients will be required to submit to random alcohol/drug testing throughout the treatment continuum.

Outpatient Services: Group and Individual Counseling services (Continued Care) are available for individuals completing primary treatment programs. Length of program is based on individual's needs.

Bed Count: 52 Beds, Adult Males
22 Beds, Adult Females

Intensive Methamphetamine Treatment Program for Women:

Phase III (Structured Living) - Clinically Managed Low Intensity Residential – Meth Women consists of 90 days of Low Intensity Residential Treatment (Level III.1) at the facility. For the first month, this level of care will require 5 hours of specific Chemical Dependency Services per week, 2 hours of Corrective Thinking, 2 hours of Recovery Support (AA/NA), 7 hours of Individualized Therapy and Release Planning. Individualized Therapy may include; parenting, life skills, domestic violence, mental health counseling, and case management. This therapy may be provided in a group setting or on an individual basis. For the remaining two months, the client will be placed in regular III.1 programming which requires 5 hours of Chemical Dependency Services per week. Random drug testing is completed.

Phase IV (Community Placement)– Local Group and Individual Counseling for the Intensive Methamphetamine Treatment Program. Phase four consists of 180 days, divided into two 90 day sub-phases. At this point in the program, the clients will be residing in their own residence. For the first 90 days the client will be required to attend 2 hours of Aftercare (Level 1) per week, 1 hour of Recovery Support per week, and 1 individual counseling session per month. For the second 90 days the client will be required to attend 1 hour of Aftercare per week, 1 hour of Recovery Support per week, and one individual counseling session per month, if needed. Clients will also be drug tested on a random basis by their assigned Parole Agents. The client is responsible for all payments for the second 90 days.

Accreditation 10/1:

Clinically Managed Residential Detoxification Services, Level III.1 Clinically Managed Residential Treatment, Early Intervention, Intensive Outpatient Treatment, Outpatient Services

Area Served:

West River area primarily, others accepted on space available basis

Eligibility:

Adults – 18 years and over

Fees:

Sliding Fee Scale

Description:

Social detoxification, custodial care, counseling, supportive services, continued care, residential and non-residential intensive outpatient treatment, family counseling, crisis interventions, treatment needs assessments, drug and alcohol evaluations, counseling and support services, DUI Offender Program, TruThought Corrective Thinking Curriculum, Moral Reconciliation Curriculum, Intensive Methamphetamine Treatment Services for Adult Women transitioning from prison to community, Specialized Long Term Day Treatment Services for individuals with meth/opiate diagnosis, Street Case Management Program.

Detoxification: The Social Setting Detoxification Program provides short-term residential care for individuals either intoxicated or withdrawing from drugs and alcohol. CCADP does accept emergency commitment applications and involuntary commitments provided criteria is met and funding is secured.

Level III.1 Low-Intensity Residential Treatment: The primary goal for this level of residential care is to provide chemically dependent clients a safe, sober, supportive atmosphere during transition into the community following successful completion of treatment. This level of care requires 5 hours of group per week and average length of stay is 30 to 90 days. The Homeless Program consists of 6 beds for those persons in need of pre/post treatment services. Those accepted into the program meet the Federal definition of homeless and can stay in the program for up to 6 months. Programs includes meals, shelter, individual/group counseling, family education, employment assistance, referrals for non-provided services, recreational activities, and transportation means. All clients will be required to submit to random alcohol/drug testing throughout the treatment continuum.

Continued Care: We hold 3 Continued Care groups weekly. Successful completion of a treatment program is required prior to acceptance into the group.

Core: Provide counseling, support services, and/or initial assessments for chemically dependent persons, or anyone adversely affected by the use of alcohol and/or drugs. Community information and referrals of services are provided.

COD Outpatient Services: Individual and group counseling services are provided in partnership with Behavior Management Systems (BMS) to individuals with co-occurring disorders.

Intensive Outpatient Treatment: Program for both men and women: This program is an open-ended program. The length of stay is determined by the individuals needs.

Slip/Slot: Residential program where the client lives at the center and has the option to work during the day and attend outpatient treatment in the day or evenings.

DUI Program (12-Hour): A 12-hour Public Safety program for first time DUI offenders can be taken on the first and second Saturdays or the second and third Wednesdays of each month. Pre-registration is required.

Sobering Beds: CCADP began a pilot project on February 1, 2012. This project consists of 7 beds in a ward for individuals volunteering to stay at the facility for purposes of securing a safe, sober environment while detoxing from alcohol. Individuals entering into this program have little to no desire to stop drinking. Blood Alcohol Concentrations must be under .280 with no history of withdrawals. Mentors are on-site to try and engage these individuals in community resources.

Residential Intensive Outpatient Treatment/Slip-Slot: Intensive Outpatient Treatment is also offered while residing at the facility if a safe, sober environment is needed.

Accreditation 9/17:

Intensive Outpatient Treatment, Level III.7 Medically Monitored Intensive Inpatient Treatment, Outpatient Services

Area Served:

Open

Eligibility:

Clients must be eighteen years of age or older, (adolescents between the ages of 11-17) meet DSM-IV diagnostic criteria for substance abuse/dependence. Service to American Indians is a high priority. Clients should be alcohol/drug free for 72 hours prior to admission and not in need of detoxification services.

Fees:

Varies

Description:

Treatment needs assessment and evaluations, adult inpatient treatment, adult outpatient treatment, adolescent outpatient treatment, continuing care for adults and adolescents.

Pretreatment Evaluations: Screening, assessment, intervention, prevention and treatment placement by qualified/certified CD Counselors are available by appointment.

Adult Inpatient Program: Therapeutic services for chemically dependent individuals who meet ASAM criteria for Level III.7 admission. The program incorporates traditional American Indian teachings with 12-step concepts. The treatment philosophy is based on Red Road, Medicine

Wheel and AA principles. The inpatient program is licensed as a twelve-bed unit. The usual length of stay is 21-30 days. Thirty hours of educational and group therapy are provided weekly in addition to 12-step study and attendance groups. Clients are provided the opportunity to participate in an Inipi Ceremony and/or attend church services. Planned recreational and physical activities are also part of the weekly schedule. Two-day family program is scheduled the final week of treatment.

Adult Outpatient Program: Outpatient treatment services (Level II.1) are provided for individuals who meet the ASAM criteria for Level II admission. The objective of the program is to provide treatment for individuals who require therapeutic and supportive counseling and referral services while living independently, who may have completed inpatient treatment previously but relapsed, or for whom residential treatment is not otherwise possible. The program meets three times per week in three hour long sessions for six weeks. A total of ten hours of weekly education classes, group therapy and individual counseling are included.

Adolescent Outpatient Program: (Level II.1 Title 19 approval) Services to adolescents who require outpatient treatment are provided. Clients should meet the ASAM placement criteria for Level II admission. Clients who require inpatient treatment services are referred to an appropriate facility. The outpatient program meets three times per week for six weeks. Family involvement is required as part of the treatment process. The adolescent program also provides continuing care for individuals who have recently completed treatment.

Fetal Alcohol Spectrum Disorders Life Skills Program
Case Management
Offender Workforce Development
Talking Circle/Inipi
Alcohol and Drug/Equine Assisted Psychotherapy Program
Educational speaking engagements
Educational corporate workshop training

Description:

The purpose of HorsePlay Productions Healing Center (HPPHC) is to provide information on alcohol and drugs; information and education on co-occurring issues and developments; education to prevent alcohol and other drug abuse; assessing a client's need for care and to provide the appropriate level of service based upon clinical assessment.

HPPHC was incorporated in accordance with the laws of the State of South Dakota on March 8, 2008 and began operation on October 1, 2009, by a local unpaid board of directors to provide counseling and referral services to people affected by chemical use and to prevent chemical dependency and co-occurring illnesses alone or associated with chemical abuse/dependency. HPPHC's procedures have been established to provide programming over a wide field of services to include culturally-specific non-traditional approaches specialized to problems/issues encountered.

Level IV Psychiatric Residential Treatment Facility (PRTF) for Adolescents

Area Served:

State of South Dakota

Eligibility:

Serves adolescents (12-17 years old) who are residents of the state of South Dakota. Applicants must be evaluated by a certified chemical dependency counselor and meet DSM IV diagnostic criteria for substance dependence. Pre-admission arrangements are required and can be made through the completion of an indigent assessment packet at a Core Service Agency. All admissions must be authorized by the Division of Alcohol and Drug Abuse. The treatment length of stay is dependent upon personal needs of the individual. Clients must be detoxed or drug-free 72 hours prior to admission.

Fees:

Voluntary admissions are required to pay the \$600.00 fee (effective 01/10) upon admission. Additional charges will be assessed according to ability to pay. Medicaid will also pay for patients who qualify.

Services:

Inpatient CD Treatment Program

Description:

Adolescent Chemical Dependency Program is a 20 bed co-ed program, which provides chemical dependency treatment to adolescents, ages 12 through 17. The average stay at the Adolescent Chemical Dependency Treatment Program is 60-120 days. The program is based on the holistic approach of treatment utilizing the 12 Steps of AA/NA.

Education services are provided to adolescents. These services are designed to meet individual needs and keep clients current with the instruction being provided in their community.

Early Intervention, Gambling, Intensive Outpatient Treatment, Level III.7 Medically Monitored
Intensive Inpatient Treatment for Adults, Outpatient Services, Level IV PRTF (Psychiatric
Residential Treatment Facility) for adolescents

Area Served:

Open

Eligibility:

Chemical dependency or gambling problems, dual diagnosis.

Fees:

Insurance coverage when available, and individual financial arrangements made when necessary, state funding, Rule 25, and IHS. Medicaid payments for adolescent PRTF unit.

Description:

Pre-treatment evaluation, detox, adults and male and female adolescent residential programs, aftercare, family program, pre-treatment counseling, intervention services, individual counseling by appointment, intensive outpatient treatment, gambling treatment and dual diagnosis care.

Pre-Treatment: Free screening for adolescents, interventions, fee for adult assessment negotiable.

Residential Treatment Program: Adults and male/female adolescents (separate programs). A residential facility operating twenty-four hours a day, seven days a week, offering therapeutic programs for chemically dependent or substance abusing persons, their families, and co-dependents. Adolescents have a school program with a full-time teacher, psychiatrist and full time clinical psychologist on staff. Adults may also be seen by a psychiatrist, psychologist specializing in chronic pain and by a full time psychologist.

Aftercare: Continued interaction with the client designed to support and to increase the gains made in the treatment process. There are aftercare groups held at the Sioux Falls Outreach Center on Wednesday afternoon and also Thursday night. Donations requested if able.

Family Program: There is an intensive 2-day family program, 9 am - 5 pm (Monday and Tuesday). There is no cost for the program if a member of the family is in residence. While there is no charge for the family program, there is a charge for meals. Family sessions are also held every Sunday from 1 am - 2 pm. Parent support group is Wednesday evenings at the Outreach Center.

Intensive Outpatient: Eight week, structured, evening and daytime outpatient program. Family included.

Gambling Treatment: Free assessment and six-week outpatient group or intensive inpatient programs.

Accreditation 3/31:

Level III.7 Medically Monitored Intensive Inpatient Treatment for Adults, Intensive Outpatient Treatment/Outpatient Services for Adolescents (12-17 years of age) and Adults (18 and over).

Area Served: Boundaries and surrounding area of Pine Ridge Indian Reservation.

Eligibility: Native Americans/American Indians within boundaries and surrounding area of Pine Ridge Indian Reservation. Services are provided for both youth (12 to 17 years) and adults (18 and over).

Fees: None.

Services:

Outpatient counseling, assessments, referral, continued care, residential treatment, and DUI classes. The Program meets all requirements for Indian Health Service standards of care and is recognized by the SD State Division of Alcohol/Drugs to provide Intensive Inpatient and Outpatient services. Clinical staff are nationally certified chemical dependency counselors/trainees.

Early Intervention: A nonresidential program providing direct supportive client contact, indirect or collateral client contact, community information and coordination and liaison services. This includes walk-ins, telephone contacts, family referrals and critical care contacts.

DUI Classes: 12 hours of education.

Out-Patient For Youth/Adults: Who meet the criteria for this level of care or who are awaiting inpatient treatment will receive the following services:

- Treatment Needs Assessment
- Treatment Planning with systematic treatment plan review
- Individual Counseling up to twelve sessions
- Group Counseling
- Family Services
- Client Education

Inpatient Program Residential Services: Anpetu Luta Otipi provides residential services with each cycle averaging a 30 day stay.

Continued Care/Aftercare: The following activities are provided for up to 24 months following completion of residential or outpatient treatment:

- Relapse prevention education
- Aftercare planning
- Monthly Individual Aftercare plan review
- Healing ceremonies
- Weekly Aftercare support groups
- Support system coordination and sponsor recruitment

Description:

Philosophy: Our peoples generational trauma manifests itself in addiction. Addiction, therefore, reflects our loss and grief. Healing from addiction must include our cultural norms and healing practices.

Belief: We believe that the Lakota Oyate (People) have endured hundreds of years of grief, pain, and loss. Our Oyate have learned to cope with this loss through the use of alcohol and other drugs. We, as Lakota service providers, believe that we can help our people to heal using our life experiences and our culture to overcome alcohol and drug addiction.

Hope: Our hope for the Lakota Oyate is to live a life free of alcohol and drug addiction – this hope must be built upon a foundation of our Lakota values, a natural relationship with the earth and a sense of balance within the self. These teachings are all a part of the Anpetu Luta Otipi effort – which then impacts the family, the community, and the next generation.

Values: The Lakota values are strongly emphasized in the program. The traditional Lakota values of generosity, wisdom, courage, respect and bravery guide all aspects of the program. These values provide the foundation for a healthy, alcohol/drug free lifestyle.

The 7 Directions Toward Healing: Specifically designed for the Lakota Oyate. A culturally based curriculum which utilizes the Lakota values to assist the Oyate in realizing how their use of chemicals negatively affects all parts of themselves and their family. A guide for Living in a Red Day – a life free of alcohol and drug addiction.

The Oyate will Leave the Program With: Information and knowledge on how alcohol and drugs affect them physically, emotionally, mentally and spiritually. A sense of self worth. A foundation of self respect. A willingness to make the effort to “Live in a Red Day” without alcohol and other drugs.

Accreditation 8/10:

Level IV Psychiatric Residential Treatment Facility (PRTF) for Adolescents

Eligibility:

Applicants must be between the ages of 12 and 18 years of age and meet DSM IV diagnostic criteria for substance abuse. Applicants must be evaluated by a certified chemical dependency counselor prior to admission. If this is not possible, the admission shall be considered tentative pending further evaluation. It is also preferred that an application packet be submitted prior to client admission (emergency placement arrangements can be made by contacting the Chemical Dependency Services Coordinator). Payment arrangements must be established prior to admission.

Fees:

Inpatient funding is available through the following: South Dakota Medicaid, Indian Health Services, Tribal Funding, Insurance, Federal Bureau of Prisons, Private pay (funding arrangements must be secured prior to admission).

Services:

Intensive inpatient treatment, intensive short-term relapse program, assessments, individual, family and group counseling

Description:

The Our Home Rediscovery Program is an intense 45-60 day program designed specifically to provide drug and alcohol treatment services to youth. There are three basic assumptions central to the program approach. They are:

1. Chemical addiction is a disease and entails the entire ramification of other health disorders.

2. Treatment services are best provided in an atmosphere of care and concern.
3. Developing sound peer and other social skills are critical in the recovery process.

The program also acknowledges that youth with substance abuse disorders typically present with co-existing problems and multiple needs, which may or may not be the direct result of their substance use. Therefore, the treatment process must focus not only on the primary substance abuse disorder but also on the co-existing concerns that may exist.

The specific program philosophy and approach taken by the Rediscovery Program toward the treatment of the direct substance abuse disorder is specified in the following treatment philosophy and entailed assumptions. In conjunction with the treatment philosophy, the program offers certain guideposts to assist in the treatment and recovery process. These guideposts include assessment, treatment planning, individualization, progress review, case management and discharge planning. Youth participation shall participate in the development of and receive planned tasks that are, identified in the client's Individualized Treatment Plan.

- Our Home, Inc. Short Term Adolescent Relapse Treatment Program

The Our Home Short Term Relapse Treatment Program is an intensive 7-18 day program. This program is designed for adolescents with a diagnosis of alcohol and other drug dependence, and who have successfully completed drug and alcohol treatment at least once. The individual must have relapsed while living in the community. The purpose of the program is to assist adolescent in re-establishing their recovery program and in making vital community connections to support recovery. Therefore, the treatment process places a focus on identifying primary relapse "triggers", relapse prevention and developing a continued care plan. An emphasis is placed on family involvement as well as involvement from the primary referral and other community support providers.

The programs also utilizes outside resources; specifically, AA and NA as well as other community resources to enhance the treatment process.

Accreditation 5/1:

Early Intervention, Intensive Outpatient Treatment, Outpatient Services

Area Served:

State of South Dakota

Eligibility:

Clients must be an inmate of SDWP

Fees:

No fees

Description:

Treatment Needs Assessments, Intensive Outpatient Services to include primary, Native American, Methamphetamine specific, and continuing care referral. This is an outpatient treatment program for chemical dependency. Individual and group counseling is utilized. Inmates are referred for continuing care in the community upon parole or release.

A Modified Therapeutic Community for Methamphetamine addicted female inmates is also available. The program is designed for a capacity of 24 inmates for 15 months of programming; including 3 months in the main Prison, 3 months in the Therapeutic Community, 3 months in a Half Way House, and 6 months on Aftercare while living in their own residence. The Intensive Treatment portion consists of 90 days of Intense Chemical Dependency Treatment, focusing on Methamphetamine addiction. The program is 6 days per week with approximately 260 hours of specific Chemical Dependency Treatment, as well as 195 hours of additional therapy, to include Mental Health Counseling, Education, Life Skills, Corrective Thinking, and group processing for a total of 455 hours of therapy. The program is based on principles of the nationally recognized; research based Matrix Model, a highly structured, intensive program which includes the following

treatments for stimulant use disorders that have empirical support; Cognitive Behavior Therapy, Contingency Management, which involves positive rewards for treatment progress; 12 step programs and Community Reinforcement. This approach is evidenced based and monitored by assessment tools to prove efficacy. Assessment tools are administered at the beginning of each phase, which are collected by Mountain Plains Evaluation.

Accreditation 6/2:

Early Intervention, Intensive Outpatient Treatment, Outpatient Services

Area Served:

State of South Dakota

Eligibility:

Residents of the Institution

Fees:

No fees

Services:

Initial Screenings, Intensive Outpatient Chemical Dependency Treatment, Co-occurring Treatment, Continuing Recovery Class, Twelve Step Meetings, Meth Treatment, Native American specific treatment, Referral, and Parole Coordination Services

Description:

The Correctional Substance Abuse Program staff located at the South Dakota State Penitentiary provides the following services to the inmates housed in that facility:

- All adult male inmates who enter the South Dakota Department of Corrections system through the Jameson Intake Unit are screened to determine a need for chemical dependency services.
- Intensive Outpatient Treatment either consists of 15 hours of services per week for a period of 6 weeks or 17.5 hours of services per week for a period of 4 weeks. Inmates are provided with chemical dependency education, group therapy, and individual counseling.
- Co-occurring Treatment consists of 10 hours of service per week for a period of 10 weeks, focusing on individuals who have co-occurring issues to deal with (ex. Chemical Dependency and Mental Health). Inmates are provided with chemical dependency education, mental health education, group therapy, and individual counseling.
- Methamphetamine Treatment consists of 12.5 hours of service per week for a period of 7 weeks, focusing on individuals diagnosed with Methamphetamine dependence. Inmates are provided with chemical dependency education, group therapy and individual counseling.
- Native American Specific Treatment consists of 15 hours of service per week for a period of 6 weeks, focusing on the Red Road to Wellbriety. Inmates are provided with chemical dependency education, group therapy, individual counseling and participate in Talking Circles.
- A one hour weekly Continuing Recovery Class is available on an on-going basis for inmates who have completed treatment and wish to further develop and enhance their recovery strategies to avoid future relapse.
- Alcoholics and Narcotics Anonymous meetings are available 1 evening per week.

Those needing continued service subsequent to leaving the facility are referred to appropriate services in their home community. The parole coordinator provides oversight as well as coordination of services delivered to parolees. Located at the South Dakota State Penitentiary this position works directly with DOC institutional staff, parole services administration, parole officers, and community providers to ensure that all parolees are provided with appropriate and timely links to services post release.

Day Treatment, Early Intervention, Intensive Outpatient Treatment, Level III.1 Clinically Managed
Low Intensity Residential Treatment, Level III.7 Medically Monitored Intensive Inpatient
Treatment for Adult Pregnant/Parenting Females, Outpatient Services, Prevention, Level IV
Psychiatric Residential Treatment Facility (PRTF) for Adolescents

Area Served:

Open

Eligibility:

Adolescent services are geared towards youth ages 12-18, pregnant and parenting females of all ages, and adults.

Fees:

Funds may be available to provide the above services at no cost to those individuals/families who meet income eligibility guidelines. Additional payment sources include Medicaid/Title 19, private insurance, referring agencies (i.e., social services, corrections) and self pay.

Description:

Prevention programs, assessments, individual, group and family counseling, adolescent and adult intensive outpatient treatment, day treatment, inpatient treatment, low intensity residential treatment, transitional care and aftercare counseling, family program.

Volunteers of America, Dakotas is a non-profit, spiritually based organization that reaches out to empower people of all ages to become healthier, self sufficient, productive members of their communities.

Support Services and Counseling: Provides assessments, individual, group and family counseling, aftercare counseling and prevention and education programs.

Adolescent Intensive Outpatient Treatment: Provides seven weeks of intensive outpatient treatment services to adolescents and their families. Groups meet 3 days a week, 3 hours per day.

Adult Intensive Outpatient Treatment: Provides six weeks of intensive outpatient treatment services to adults and their families. Groups meet 3 evenings per week, 3 hours per evening.

Aftercare: Ongoing continuum of care services are offered for those that have completed treatment programs. Groups meet 4 days a week for a recommended six month period of time.

Residential/Inpatient Treatment: Provides up to 45 days of residential treatment services to adolescents. Additional stay beyond 45 days is possible if clinically warranted. Services include individual, group and family counseling; psychiatric and psychological services, nursing care, family program, school program, and 24 hour staff coverage. Adolescents will have an opportunity to participate in cultural activities that work hand in hand with the Twelve Steps. Some of the activities include: visits from elders, sweat lodge, arts and crafts, meditation, guest speakers and talking circle.

Outpatient Treatment and Transitional Care: Provides up to 45 days of both outpatient treatment and transitional care to adolescents who do not need residential treatment, but require a structured living environment while participating in outpatient treatment. This service is also available to adolescents who have completed residential treatment but are experiencing difficulties in maintaining ongoing sobriety. Services include individual, group and family counseling, psychiatric and psychological services, nursing care, family program, school program and 24 hour staff coverage.

The New Start Program for Adolescents is a 24 hour clinically managed low intensity residential treatment program for pregnant and parenting adolescents referred by the Department of Corrections and Social Services, Human Services, Court Services or the private sector. Comprehensive services provided include prenatal, postpartum, and well baby care, child care and parenting services, basic life skills education, educational and employment services, chemical dependency services, mental health counseling and case management. These services allow participants to gain the skills and resources necessary to live a healthy, drug free life and to develop positive parenting practices for themselves and their child(ren).

The New Start program for women is a 24 hour residential treatment program that offers both medically monitored intensive inpatient chemical dependency treatment and clinically managed low intensity treatment to chemically dependent pregnant and parenting women. Comprehensive services provided include prenatal, postpartum, and well baby care, child care and parenting services, independent living skills training, educational services, employability skills training, chemical dependency treatment, mental health counseling and case management. Law Enforcement, Social Services, Human Services, Tribal Entities and the private sector such as physicians, attorneys and others can refer women to this program.

PRIme- Prevention Research Institute Risk Reduction Program: Provides 8 hours of prevention to individuals 19-21 years of age in relation to alcohol/drug use.

Accreditation 1/31:

Early Intervention, Outpatient Services, Prevention

Area Served:

Rapid City and surrounding communities

Eligibility:

Counseling available to all youth and families; referrals accepted

Fees:

Sliding fee scale

Services:

Drug and alcohol evaluations; individual, group and family outpatient services, aftercare, psycho education classes such as the State Certified DUI Class.

Description:

Counseling and support services for youth and families. Individual, group, and family counseling; crisis intervention; parent education; aftercare; marriage and behavioral issues.

Youth and Family Services Counseling provides crisis intervention for young people and families; counseling for alcohol and drug problems, co-occurring, child abuse and neglect, sexual abuse, family and individual dysfunctions; referral and aftercare; parent education classes; teen pregnancy prevention; networking with community agencies and schools; curriculum development and training.

The YFS Outpatient Program can be in a group or individual format. Group requires a minimum of 20 hours of direct contact, depending on the extent of the client's problems and can last 10 weeks or longer. Individual therapy is also available if work or other restraints does not allow for group

meetings. Services are conducted by Certified Dependency Counselors and Licensed Professional Counselors.

An Aftercare Program is also available. This program is conducted either individually or in groups. Program length varies depending on needs of individuals. Aftercare provides counseling related to continued abstinence from alcohol/drug use and includes topics such as relapse identification and prevention, healthy communication, support systems, rational thinking, stress management and health relationships.

Assessments are conducted using standard ASAM guidelines. The assessments are conducted in individual sessions. The cost of the Assessment is a standard \$70.00 fee for all clients who meet the financial eligibility. Otherwise the standard fee is \$294.00.
